ABOUT US

Learnworks provides the best training portal that allows you to build and manage courses easily.

You can hire our expert trainers through our Course Creation Services. However, if you want to get started, you can buy our pre-built courses, adapt them, and run them all on your platform.

TRAINING PORTAL

Learnworks provides a user-friendly training portal from which you can create and run training courses. You can build and run courses online with a customizable Cloud-based SaaS solution.

PREBUILT COURSES

Based on more than 20 years of experience, we have built a broad range of courses for Oracle e-Business Suite. Ranging from General Ledger and Payables to Cash Management, Workflow and AGIS.

All courses have the same structure with clear topics and easy to follow demonstrations. The courses run in a SaaS solution, so we take care of everything.

COURSE CREATION SERVICES

Most Organizations have a customized implementation. With Learnworks you can customize your preferred courses. This way, your employees see your flows in your corporate identity. In addition, our consultants can help you customize your courses.

WORKSHOP WITH TRAINERS

Our trainers can give corporate (and customized) training based on these courses or help you plan for HR so that your internal trainers can provide the workshop.

Prebuilt Courses

Our Pre-built courses are based on hands-on experience. Consultants with years of field experience explain the main topics and flows of the different modules. Checked and verified and presented in a standard format. So, you know what to expect. We explain topics with images and easy-to-follow texts, and demos are always short and easy to do yourself.
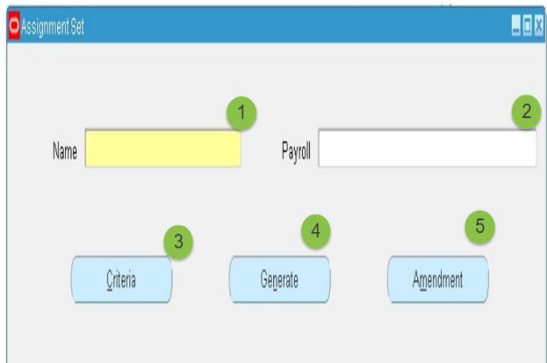

AGIS Setup Flow

Let us review the entire AGIS setup flow.
Navigate to Inter-company super user responsibility> Setup> Organizations

1 / 8

- Intercompany Super User, Vision Operations (USA)
  - Reconciliation
  - Home
  - Transaction
  - Setup
    - Security
    - Organizations
    - Transaction Types
    - System Options
    - Lookups
    - Periods
    - Accounting

Course Creation Services

Since all implementations are customized, the best courses are customized too, and this is possible. You can edit and modify the content, the order, screenshots, etc. Add information from your company, like URLs, phone numbers, or attach your procedures. Also, you can easily change the look and feel to make it in line with your corporate identity and propagate your look-and-feel over all the courses with the press of a button.

We have three levels of customization:

LEVEL A

- Add some images, URLs and other information.

LEVEL B

- Modify some work processes.
- Explain modified screens or menus

LEVEL C

- Explain totally new modules that were built for the client
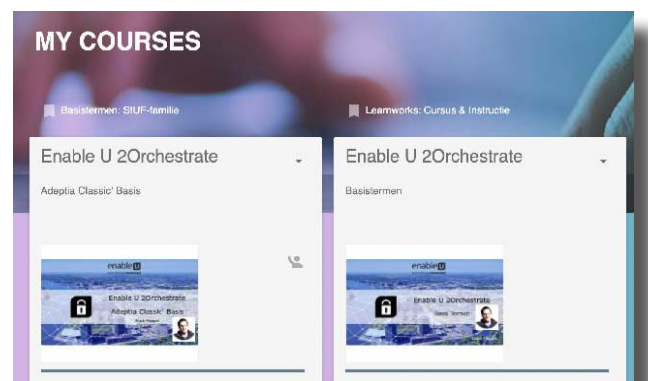

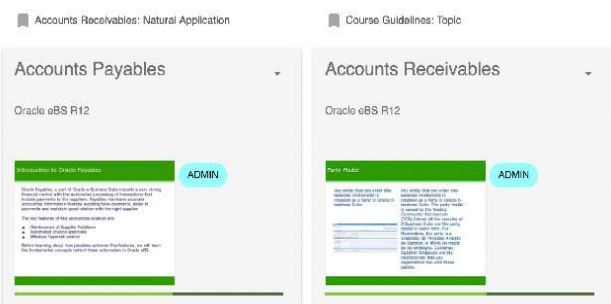

Workshop with Trainers

Use your trainers or hire us. Our experienced trainers can guide you through the material and give excellent workshops.

Most clients want a Hybrid Course. That is one hour of training in the morning and afternoon. During the training, your employees can work online, do exercises, ask questions in the forums, or do their normal work. With this, your departments can keep on doing their work and be available. Even if most or all.
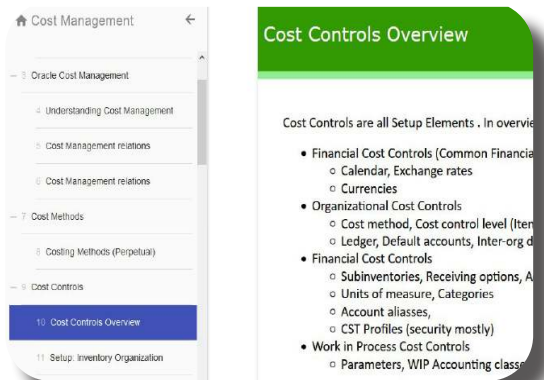

Oracle Cash Management R12

Topics:

-Target Balance

-Bank Accounts

-Create A Bank

-Payment Template

-Setting up and Performing a Bank Transfer and more...

€ 1850

€ 1850

OUR PROMISES

● **"Best in Class Portal"**

It was built by trainers for trainers. Fully integrated, no external tools are needed. Import your PowerPoint files as a quick-start, use layout templates for a uniform Look-and-Feel with your design. Comment in the courses, record videos with your browser. Bookmark pages. Full text-search over and in courses. Enroll large groups of users and assign groups of courses with minimal maintenance. Apply self-registration for groups of users and many more features.

● **"High-Quality Courses"**

Ninety percent of traditional learning materials are too difficult to understand. With our pre-defined templates, you can build innovative, comprehensive courses to close the knowledge gaps and deliver measurable outcomes.

● **"Fast Delivery"**

With Learnworks, you can accelerate the delivery and use of courses in three ways. Build quick with our pre-defined content and layout templates, buy pre-built courses, and help us with our course building services.
